

# Playground of Science

Thursday, October 24th from 6:00 – 9:00 pm

At Coe College in Peterson Hall of Science on College Dr.

## **Come learn about science!**

You could watch objects levitate, launch pumpkins, shatter grapes, make ice cream with liquid nitrogen, produce snow, learn about the math of bubbles, observe molten glass, and see models of hearts and eyes to learn about the human body with the help of Coe faculty and students from physics, biology, chemistry, mathematics, computer science, nursing, psychology, and ROTC.

The Playground of Science is **free** and geared toward elementary school students and their parents though we are certain almost everyone will have fun. For more information email Coe Physics Professor Steve Feller at [sfeller@coe.edu](mailto:sfeller@coe.edu) or call 319-399-8633.
