

YOU ARE INVITED

The Dangers of Indoor Tanning and What YOU Can Do About It-

American Cancer Society Cancer Action Network (ACS CAN)

Those who use tanning beds before the age of 35 increase their life-time risk of melanoma by 59%. Over 33 states have indoor tanning regulations, most restricting youth access. Iowa has no age restrictions. We can do better to protect Iowa youth from the dangers of indoor tanning bed use, but we need YOUR help. Attend a training and learn how you can help prevent skin cancer!

Tuesday, February 24th
